

Dot-to-dot & Colouring

The Easter Butterfly

At Easter we celebrate the resurrection of Jesus, who conquered death forever! Show your Easter joy by making the butterfly below light up in bright colors. If you like, you can also hang the picture up in a place where it will often remind you of Easter. Enjoy connecting the dots and coloring the picture!

"If the caterpillars knew what they would be once they were butterflies, they would live quite differently."

HEINRICH BÖLL, German writer

PS: Butterflies are a very popular symbol for Easter. The transformation of the butterfly from a cocoon to a colorful butterfly or from darkness to light is an apt image for the resurrection. Resurrection means that someone who has really died receives new life from God.
