

Color the icon below - the so-called Trinity icon by iconographer Andrei Rublev. If you like, you can use similar colors to the original picture.

PS: Before you start: Be aware that the production of a genuine icon is subject to strict criteria. Special painting techniques, in which selected shapes and colors are applied layer by layer in the finest glazes until the picture is finished, have a religious meaning: icons are so-called windows to heaven. They are intended to make God's presence tangible through their contemplation.

The Trinity Icon

by Andrei Rublev (1411)
